

Module 7

Usability and Revision Report

Comments

The comments I received were positive, people were appealed to the graphics of the site and liked the website's uniqueness and creativity. However they sought overall more cleanliness and direction to increase usability.

Revision

I altered my background image to help make the fonts more readable but I kept the main format in place to sustain the creative elements originally implemented.

Reflection

As our first in class reflection I really enjoyed this assignment. I was doubting the look of my page and receiving the positive feedback was motivating. It was also helpful to look at other people's sites to get ideas and to overall just share our struggles and watch our ideas build through collaboration.
